2. Lithium-ion battery into the compartment. Note that the metallic contacts must be aligned with the contacts in the compartment.
3. After the battery is properly installed, close the battery cover.

Charging the battery

When the battery level is low please charge the battery.

1: Turn the camcorder power off .

2: Connect the camcorder and PC via the attached USB cable. When the battery is being charged the charger lamp will light blue.

3: When the charge is completed the charger lamp turns off. Disconnect the camera and the PC.

Caution:

● It is normal that when it is charging the camera body is warm.

Inserting the Memory Card

If you want record more you have to use a SD or MMC card. Turn off the camcorder before inserting or removing the memory card. Be sure to orient the card correctly when inserting it. Never try to force the memory card into the slot when you feel resistance. The SD memory card has a write protect switch, which used to protect data from accidental deletion. Therefore, whenever you want to record, format or delete files in the SD card, disable the write protection beforehand.

1. Turn off the camcorder.
2. Push the lock on the battery cover to the

4

right to open the battery cover.

3. Insert the memory card as illustrated.

4. After the memory card is properly inserted, replace the battery cover.
